

# INSTRUCTIONS FOR USE

## Uniform Energy Field (UEF) - Grounding Block High-Definition Grounding Cable and Basic Grounding Cable

In order to take full advantage of Synergistic Research UEF technology in a complete audio setup we have developed a unique and effective grounding system. The Grounding Block allows you to “Star Ground” a combination of up to 18 UEF cables, Tranquility Bases, FEQs, Atmosphere as well as Phono Pre Amps etc. The Grounding Block also has UEF technology built in to further enhance the performance of these components. The Grounding Block along with Synergistic’s state of the art “Ground Plane” technology even further reduces the signal/noise floor. As always this is all done completely outside of the signal path.

Synergistic Research Grounding Blocks come with (6) Standard ground leads used for Atmosphere Series Interconnect and Speaker Cables. Standard ground leads are also available with banana connectors to use with Tranquility Bases, FEQ’s and Atmospheres.

In addition to standard ground leads we have developed optional Basic Grounding Cables and High Definition Grounding Cables. When connected to your Grounding Block, these cables are designed to even further advance the performance of your Synergistic Research products as well as almost all components found in your audio system. Basic and High Definition ground cables are available in RCA, XLR, Spade, Banana, USB, Ethernet and more.

You can use your SR Grounding Block either with or without the provided connection to a wall outlet. All connections made to the Grounding Block will form a “Star Ground”. Depending upon your particular system, hooking up this “Star Ground” directly to a wall outlet may add to your system’s performance. It is our suggestion that you listen to it both ways. If you do hook up the Synergistic Research Grounding Block directly to a wall outlet it must be a properly grounded outlet for performance and most importantly, for safety. If you are not sure if the electrical wiring is properly grounded, have it checked by a qualified electrician.

### Set-Up and Placement

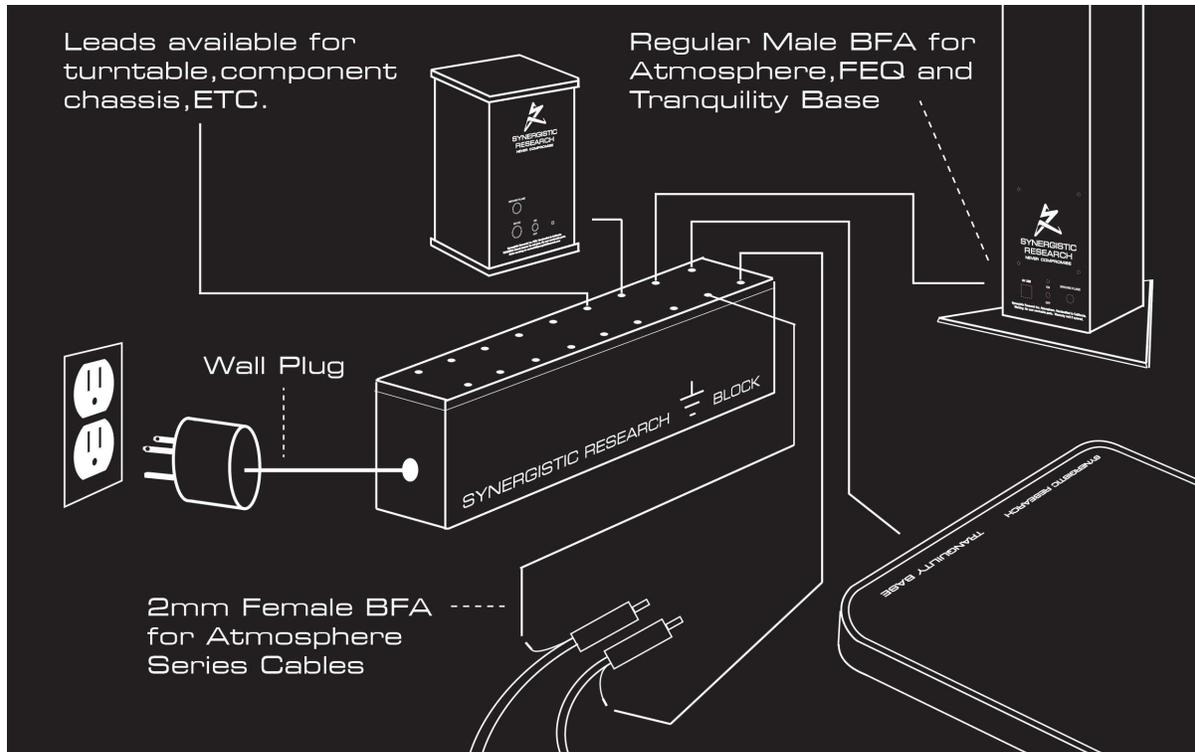

- Place your Synergistic Transporter Grounding Block on an audio rack shelf or on the floor close to your system.
- Optional \* Connect the Wall Plug into a grounded wall outlet
- Optional \* Attach the Banana end of the Wall plug wire into the side of the Grounding Block.
- Connect your Atmosphere series cables, Atmosphere, Tranquility Bases and any other device that needs grounding using the 2mm Ground wires.
- If additional Ground wires or Extension Ground wires are needed please contact your Synergistic Research dealer
- If you are ever in question about the correct operation or design of your UEF Grounding Block or any other issue or comment, please call us for assistance at (949) 476-0000 or email at [service3@synergisticresearch.com](mailto:service3@synergisticresearch.com)
